

**SU-re.co**  
sustainability & resilience

## 'Adding Sustainable Meanings'

*Established in 2015, su-re.co (Sustainability and Resilience.co) is a young environmental think-do-be-tank, based in Bali, Indonesia. **Our vision is Becoming a globally admired unique organization that influences how businesses can have a sustainable and resilient meaning. Moreover, our mission is Adding a sustainable meaning to knowledge, services, products, and ourselves through synergy. Su-re.co believes consistency is the key to creating a resilient company and society.***

Our organization started as a Think-Tank,

meaning

that

we are working for a few, climate change focused projects in the form of strategic supports of international organisations, academic research and consulting services.

In 2015 we were involved in two European Commission research projects TRANSrisk (N°642260) and Green-Win (N°64201) aimed at creating a sustainable future for Indonesia. As a result, we shifted to be “Gift-Makers” with the values:

### ***Think Sustainable, Do Sustainable and Be Sustainable***

Our Gift to you is the Climate Smart coffee and cocoa called

## **su-re.coffee and su-re.cocoa**

that helps to make the results of our research come to life.

### ***How is su-re.coffee and su-re.cocoa Climate Smart?***

For every coffee and chocolate bought, **25% of the sales** will be used to provide biogas digesters and Climate Change field schools for coffee and cocoa farmers who grew them. This is how we can give a gift back to farmers.

## **About Climate Change**

*According World research institute, Indonesia is the fifth largest emitter of greenhouse gases in the world. The biggest cause for this is land use and the second is energy. During the 2015 peatland fire, in that several days, Indonesian green house gas emission surpass European Union's whole year worth of*

*emissions. Indonesia is also one of the most vulnerable countries for climate change impact due to our high level of biodiversity and the 15000 ++ islands we possess.*

*On average the world temperature has risen up to 1 degree Celsius, we are all working together to prevent it from going to 1.5 degrees. So.....*

***Let's make a change together.***
